DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 9/29/08 have been fully considered but they are not persuasive. With respect to applicant's argument against the Miyagami reference, in the last paragraph of page 8, that the straighten vanes (76a, 76b) does not have "a finite thickness and project inwardly into the channel," this is found not persuasive because such language is not in the independent claims. As shown in Fig. 6 of Miyagami, members (76a and 76b) project inwardly from wall (74) which met the claimed language.

Specification

2. The abstract of the disclosure is objected to because it is not in a single paragraph. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 10, 12-19, 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001220805 A (hereinafter Miyagami) as set forth in the previous office action.

Miyagami discloses a drain socket as claimed comprising a drain socket (see Fig. 9) as claimed, a siphon inducing region as claimed (about 74), two straightening vanes (76a)

as claimed in a channel expansion section and a groove therebetween. The introductory statement of intended use and all other functional phrases have been carefully considered but are deemed not to describe any structure patentably distinguishable over the drain socket that disclosed by Miyagami which is certainly capable of being used in the claim manner.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 7-9, 11, 20-23, 25 and 27-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyagami in view of JP 08326136 A (hereinafter Yosuke) as set forth in the previous office action.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
